

The LS2 logo is displayed in white, italicized, sans-serif font on a red rectangular background in the top right corner.

LS2

A black and white advertisement for the LS2 2025-2026 collection. It features a person wearing a full-face LS2 helmet and a matching motorcycle jacket. The helmet has a large, dark visor and the LS2 logo on the chin. The jacket is dark with light-colored accents on the shoulders and sleeves, and the LS2 logo on the chest. The background is a blurred outdoor scene. The text '2025 2026 COLLECTION' is overlaid at the bottom in a large, white, sans-serif font.

2025
2026
COLLECTION

LS2

LS2 was founded in 2007 with a clear and ambitious mission: to become the global leader in the motorcycle helmet industry. Since then, it has grown rapidly, combining innovation, safety, and design to meet the demands of riders worldwide.

Beyond helmets, LS2 now offers a complete range of motorcycle gear—from jackets and pants to gloves, boots, goggles, and accessories—catering to every need of two-wheel enthusiasts.

With distribution in over 130 countries and market leadership in many of them, LS2 stands as the fastest-growing brand in its field, a testament to the trust and loyalty of motorcyclists around the world.

BRAND PILLARS

1 SAFETY

Protecting your dreams! Safety is our number one priority; we are committed to offer maximum protection to all our riders.

2 QUALITY

We only use high quality materials! Our products meet or exceed the most demanding test standards required internationally.

3 INNOVATION

LS2 constantly invest in R&D and we are continuously searching for modern technology to incorporate into all our products.

4 DESIGN

Innovative design that blends creativity, function, and safety—enhancing the user experience without compromising on quality.

5 PASSION FOR RACING

We love motorsport! LS2 is a proud sponsor of several riders in different categories (MotoGP, Moto2, Moto3, SuperBike, Dakar and many more).

MATERIALS

CARBON

Carbon Fibre is a material used extensively in the aeronautical industry and of course in the highly competitive world of Formula 1 and MotoGP. It has incredible strength but it's extremely light. LS2 uses multiple layers of our exclusive wide-weave carbon fibre for a very light, but strong shell that offers state-of-the-art energy management for the utmost on safety.

6K CARBON FIBER

With a minimum 6000 carbon fiber weave, LS2 sets the pace for high performance Carbon Fiber motorcycle helmets beyond the capabilities of any other helmet manufacturer in the market.

9K CARBON FIBER

Champions need championship-level equipment. Our top racing helmets, the FIM approved THUNDER GP PRO & X-FORCE are ultra-light with enhanced shock absorption attributed to the high-performance 9000 Carbon Fiber weave.

HPFC

(HIGH PERFORMANCE FIBREGLASS COMPOSITE)

High Performance Fibreglass Composite is a carefully layered, proprietary blend of a unique weave of fibres pre-filled with resin into a strong, ultra lightweight, but rigid shell that bears an impact while better dispersing and managing energy for a safer ride.

KPA

(KINETIC POLYMER ALLOY)

A proprietary material specifically formulated by LS2, KPA utilizes nanoparticle technology to blend space age thermoplastics along with microscopic levels of aramid fibres for a material that is strong, lightweight, and offers the latest in high performance energy management for a safer ride. This special formula meets both ECE 22.06 and DOT requirements.

HPTT

(HIGH PRESSURE THERMOPLASTIC TECHNOLOGY)

LS2 developed HPTT as the perfect blend of ABS and other thermoplastic polymers to offer the ultimate balance between safety, energy managing performance, weight, and value.

X-static®

X-STATIC® fabric is bonded with 99.9% pure silver to the surface of Nylon 6.6, meaning that no nanotechnology chemicals are used to create permanent antibacterial, odor control, thermal regulation, and anti-static electricity functions. These functions will not fade after many washes and will last for the product's entire lifespan. X-STATIC® has been proven to effectively inhibit bacteria and mold, thus helping to reduce unpleasant odors.

COOLMAX®

Coolmax® fabric helps evaporate moisture and promotes breathability. It is made of a special fiber, composed of four to six channels that create a transport system capable of moving moisture from the skin to the outer layer of the fabric. This system dries moisture faster and more effectively, while simultaneously regulating body temperature through evaporative cooling.

MATERIALS

WATERPROOF LS2 SHELTEX®

Innovation and protection, engineered by LS2

Developed and patented by LS2's R&D team, the Sheltex® membrane is an advanced solution offering top-tier protection from rain and wind without compromising comfort. Combining high performance with innovative design, it's the go-to choice for reliable weather defense.

- **Waterproof:**
Keeps you dry even in extreme wet conditions.

- **Windproof:**
Blocks cold air completely, preventing wind chill.

- **Breathable:**
Releases moisture and sweat to maintain comfort.

- **Lightweight & Flexible:**
Ensures freedom of movement and all-day wearability.

- **Durable:**
Built with high-quality materials for long-lasting use.

- **Versatile:**
Suitable for jackets, gloves, boots, and more—ideal for motorcyclists and outdoor enthusiasts alike.

LS2 SHELTEX® VERSIONS

Sheltex®

Lightweight, breathable and windproof protection against rain and wind, perfect for urban riders on short or daily commutes.

Waterproofness: 8000 mm H₂O

Breathability: 8000 g/m²/24h

Sheltex® Plus

Exceptional protection from rain and wind, while maintaining comfort in use, ideal for medium distance trips and journeys where performance and comfort are paramount.

Waterproofness: 15000 mm H₂O

Breathability: 12000 g/m²/24h

Sheltex® Ultra

High performance material that provides exceptional waterproofing, excellent breathability and superior wind protection. Designed for long distance riding and adverse weather conditions, it ensures long-lasting comfort and reliable protection.

Waterproofness: 20000 mm H₂O

Breathability: 20000 g/m²/24h

MATERIALS

GRAPHENE FABRIC

Graphene is a lightweight, ultra-strong material with excellent thermal and electrical conductivity. In thermal clothing, it regulates heat, improves breathability and durability, and offers antibacterial protection—ensuring comfort in any climate.

ALPINE FABRIC

Originally developed for high-performance ski gloves, ALPINE is a premium fabric offering outstanding waterproofing, durability, and cold resistance. Its advanced construction provides lasting protection and flexibility in extreme conditions, making it ideal for winter gear where performance and comfort are essential.

DUPONT™ ARAMID FIBER

Aramid fibers add strength, flexibility, and lightweight cut and abrasion resistance to modern fabrics. Despite being lightweight, they are heat and fire-resistant and up to five times stronger than steel. LS2 uses Aramid fiber to reinforce our jeans and casual pants.

CORDURA®

Cordura® is a **DuPont™**-developed, abrasion-resistant nylon fabric with a dense weave and water-resistant treatment. Twice as durable as standard nylon and ten times more durable than cotton, it is available in various weights and thicknesses. Cordura's high durability and abrasion resistance make it ideal for military equipment worldwide.

OXFORD FABRIC 600D

This special material offers superior performance, high abrasion, and tear resistance in a lighter, more comfortable garment. Wrinkle-resistant Oxford polyester fibers retain shape and meet OEKO-TEX Standard 100 and EN17092 standards. LS2 softens the polyester fiber without compromising performance.

OXFORD FABRIC 450D

Our 450D Oxford fabric is a lighter version of our 600D, maintaining superior abrasion and tear resistance. Oxford polyester fibers are wrinkle-resistant, offer excellent shape retention, and have a soft, ultra-comfortable texture.

SUPERFABRIC®

SuperFabric® is a durable, flexible material with hard guard plates for extreme protection. Used in protective clothing, footwear, and gear, it offers excellent cut, puncture, and abrasion resistance, ideal for tough environments.

SPANDEX

Spandex is the leader in high stretch comfort fabrics. Made from polyurethane fiber, Spandex makes for a perfect, form-fitting, flexible material. Its unique composition allows this fabric to guarantee outstanding comfort and freedom of movement.

RIPSTOP

Ripstop fabric has reinforcing threads woven in a grid pattern throughout the material. This webbing adds strength, abrasion and tear resistance, making for an exceptionally durable garment, while maintaining a high level of comfort.

3 LAYER SOFTSHELL

Developed to improve comfort while maintaining a high level of water resistance, 3-layer softshell fabric is a modern marvel. Made of super elastic polyester, our 3-layer softshell combines unmatched strength with elastic properties for extraordinary levels of comfort and performance.

OXFORD DOBBY

Oxford Dobby Laminated fabric combines abrasion-resistant strength with waterproof and breathable materials, enhancing comfort and performance. It sets a new standard in quality, safety, and style for LS2 motorcycle apparel.

RUCO®-THERM CMB

RUCO®-THERM CMB is a thermal comfort finish that provides a dual effect. It features sensory cooling through a menthol derivative and long-lasting evaporative cooling with a moisture-responsive polymer that offers a depot effect for extended performance.
